Editor Executions Evaluations

Readme

Load your data into a vector database with the **1. Load Data** flow, and then use your data as chat context with the **2. Retriever Flow**.

Quick start

1. Click on the **Execute** button to run the **1. Load Data** flow.

2. Click on **Run** (just button to run the **2. Retriever Flow**, then ask a question about content from your documents).

For more info, check [our docs on RAG in n8n](#).

Embeddings

The insert and Retrieve operation use the same embedding model.

This is to ensure that they are using the exact same embeddings and settings.
